ITER is the large-scale international scientific experiment that aims to demonstrate the scientific and industrial feasibility of fusion energy for peaceful purposes.

The Monaco-ITER International Fusion Energy Days (MIIFED) combined with the ITER Business Forum (IBF) will bring together testimonies and experiences from the world industry about their participation in ITER.

The conference will also review the progress achieved so far, the status of construction and manufacturing, and the upcoming industrial activities.

Through B2B and B2C contacts, the event will also stimulate networking and technology transfer.
